

VITAMIN D LIPO-SACHETS®

PROVEN

Superior Absorption

TO STANDARD VITAMIN D¹

Liposomal vitamin D3 to help support
bone & immune health year round

liposachets.com.au

Why take VITAMIN D LIPO-SACHETS®?

- ✓ Promotes calcium absorption – a diet deficient in calcium can lead to fragile bones in later life
- ✓ Supports healthy bone development
- ✓ Helps support immune system function
- ✓ Supports nervous system function
- ✓ NO added sugars², alcohol, gluten & GMO
- ✓ NO artificial flavours, colours or thickeners
- ✓ Suitable for vegetarians
- ✓ Our single dose foil sachets are convenient, easy to use and protect the vitamin D from oxidation

How does LIPO-SHELL® technology work?

High quality liposomes act as stable carriers, encapsulating and protecting the vitamin from degradation by substances within the body's digestive system.

This allows for the efficient transport of the vitamin to the body's cells for **increased bioavailability and high absorption**.

1000IU
for adults
available in Melon
flavour

ACTIVE INGREDIENTS:

Each 5g sachet contains Cholecalciferol 25 micrograms equivalent to **1000IU** vitamin D3.

DOSAGE:

Adults only: 1 sachet once daily.

Consume the content of one sachet as is or dissolve in a small amount of cold, still water. Do not exceed the daily recommended dose. Not to be used in children under 12 years of age without medical advice.

ALWAYS READ THE LABEL AND FOLLOW THE DIRECTIONS FOR USE
